SUMMARY

Purpose-driven AI specialist with multiple years of experience. Expertise in Python and PyTorch with proven track record of developing and deploying effective AI. Enthusiastic about automation technologies. Striving for a tomorrow without toil.

PROJECTS

Second Opinion

Personal Project · https://huggingface.co/spaces/sRjN17/SecondOpinion
· November 2023 - January 2023

- Developed an AI model to predict the type of brain tumor using MRI scan.
- Achieved up to 83% accuracy on the test dataset, demonstrating strong predictive capabilities.
- Utilized advanced machine learning technique to analyze medical imaging data.
- Implemented efficient training algorithms and optimizations to minimize computational resources and time.

EDUCATION

Bachelor of Computer Science and Information Technology

Prithivi Narayan Campus, Pokhara · Gandaki, Nepal · 2026

SKILLS

Python

PyTorch

Pandas

Selenium

Flutter / Dart
